

## SNE/MA Winter Flounder Landings and Discards

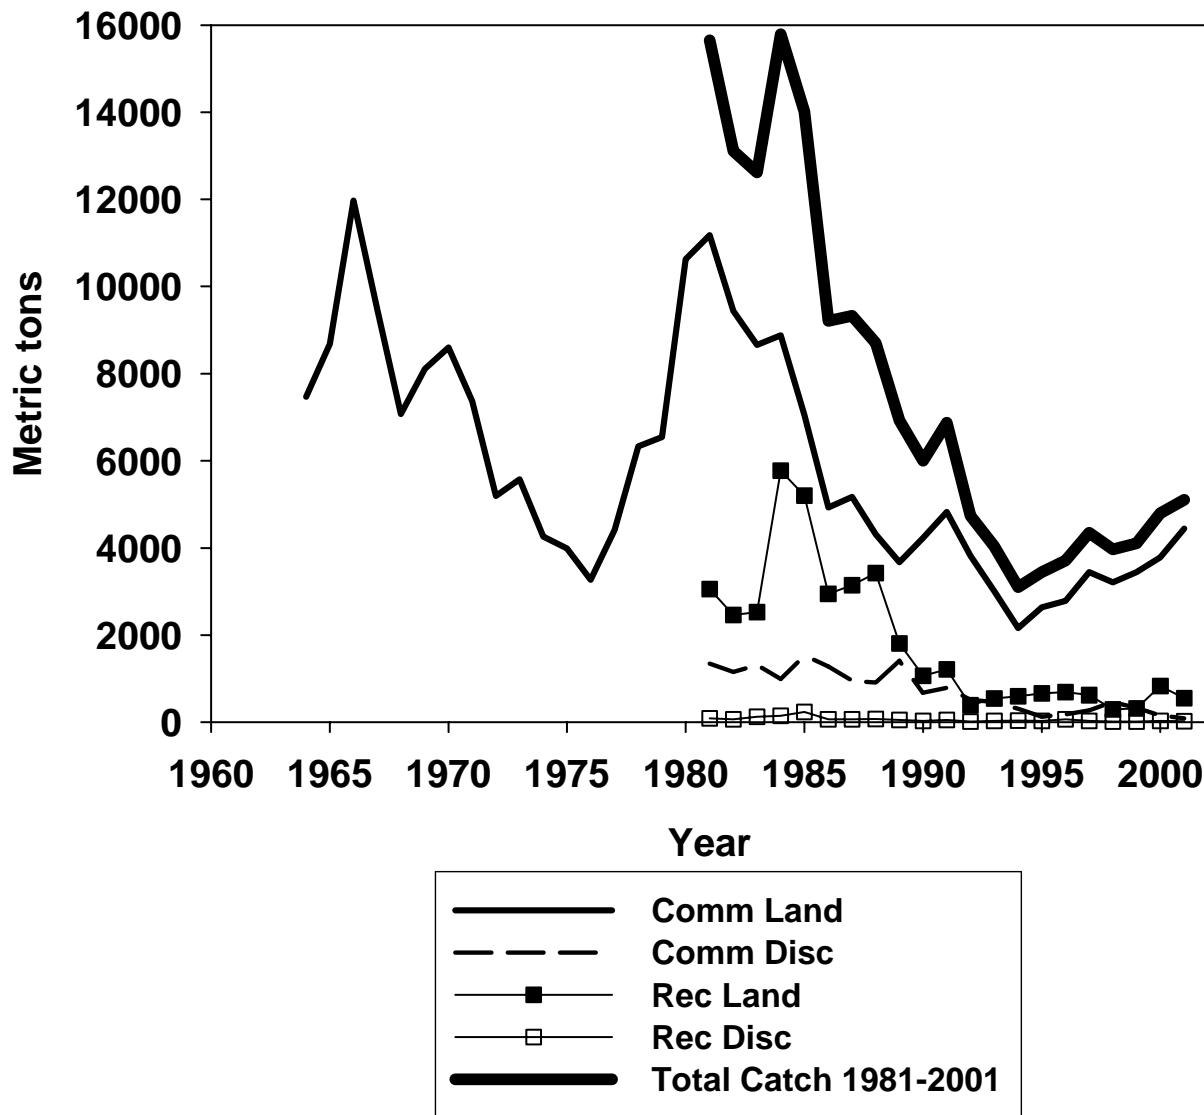

Figure B1.1. Commercial landings (1964-2001), commercial discards (1981-2001) recreational landings (1981-2001), recreational discards (1981-2001) and total fishery catch (1981-2001) for the SNE/MA winter flounder stock complex.

**SNE/MA winter flounder  
Total Catch Age Composition**

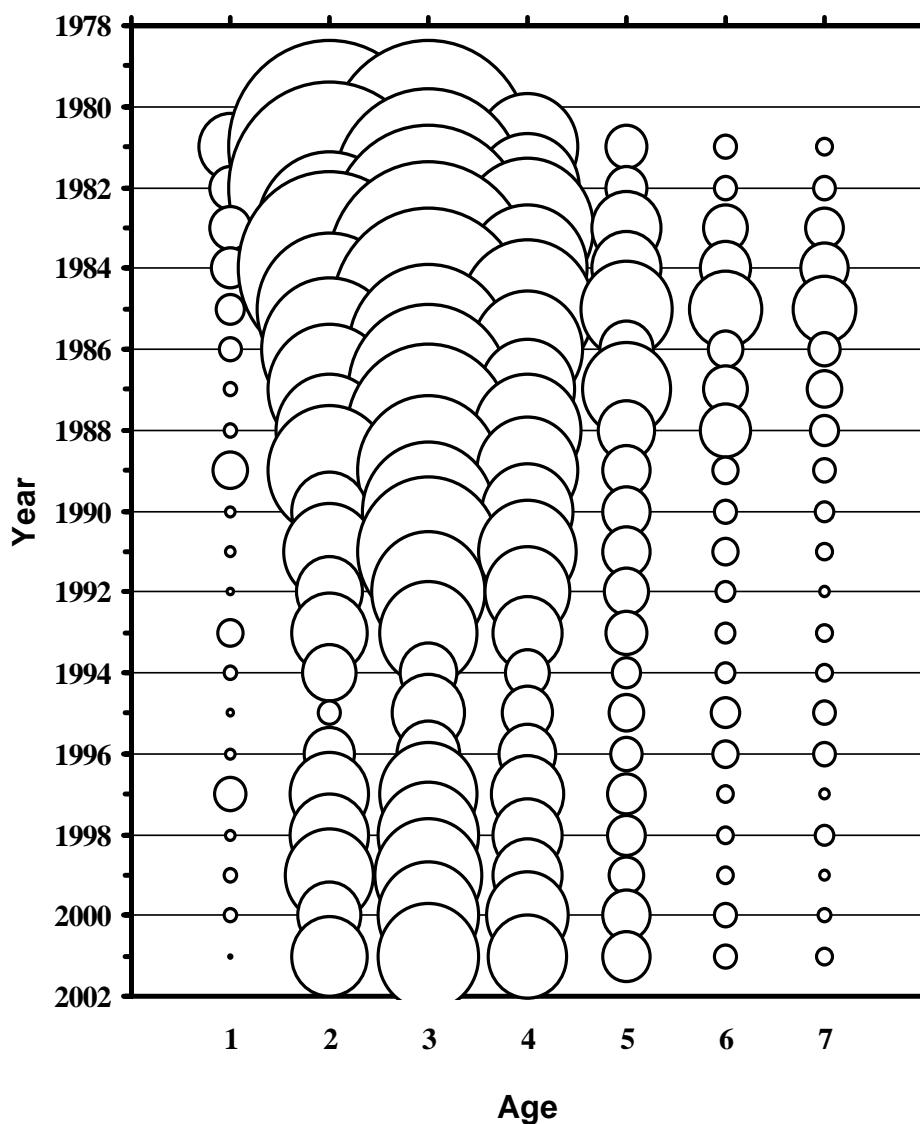

Figure B1.2. Total catch age composition: 1981-2001

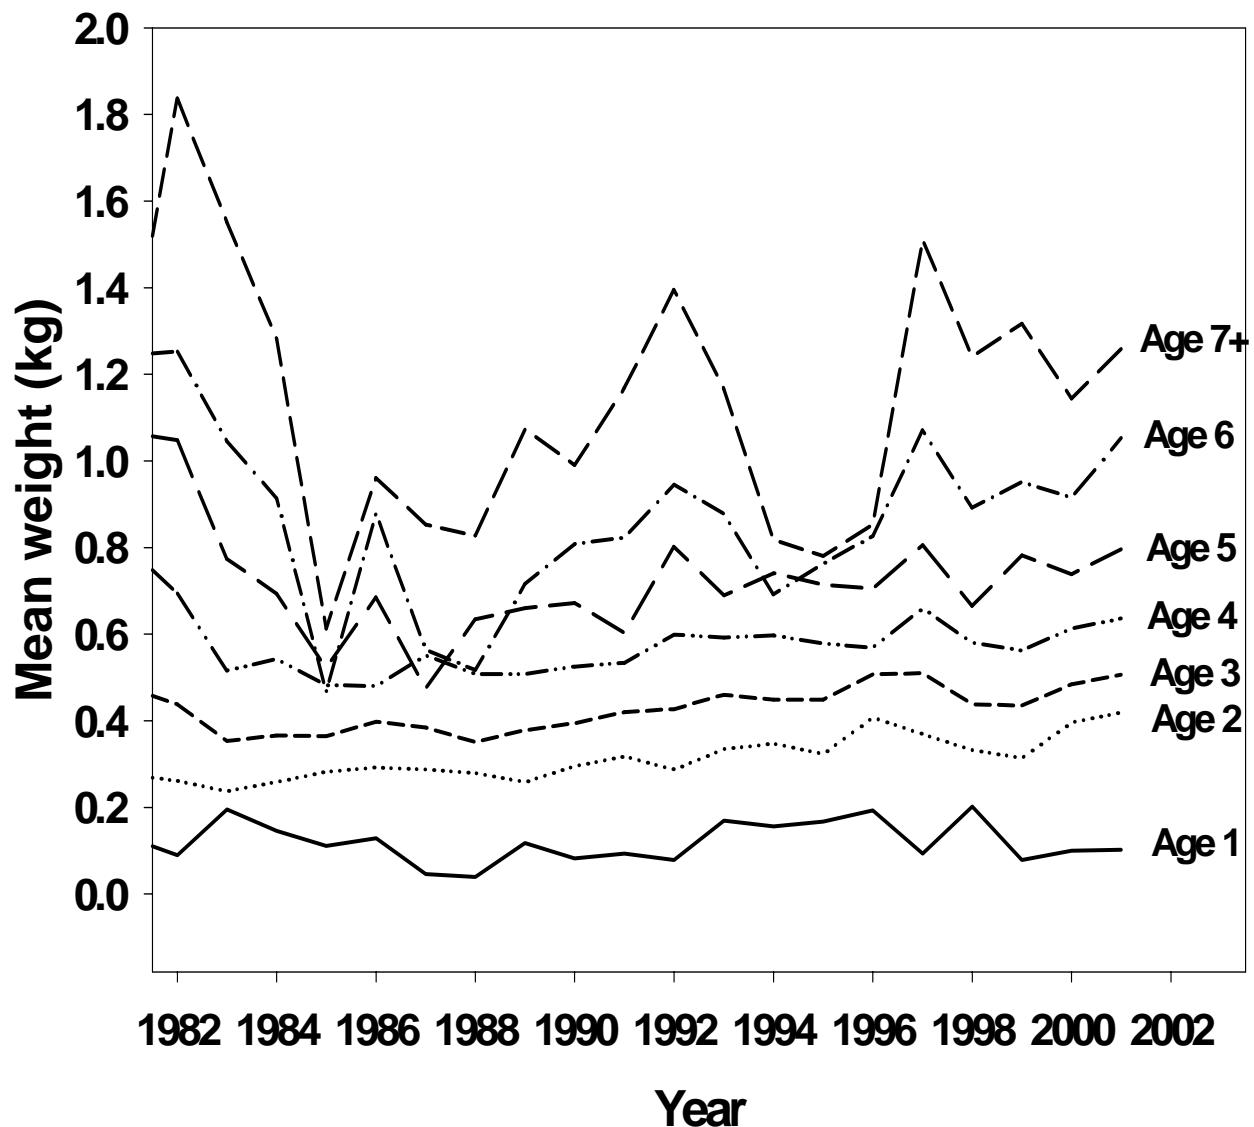

Figure B1.3. Trends in mean weight at age in the total catch of SNE/MA winter flounder.

## SNE/MA Winter Flounder Survey Biomass Indices

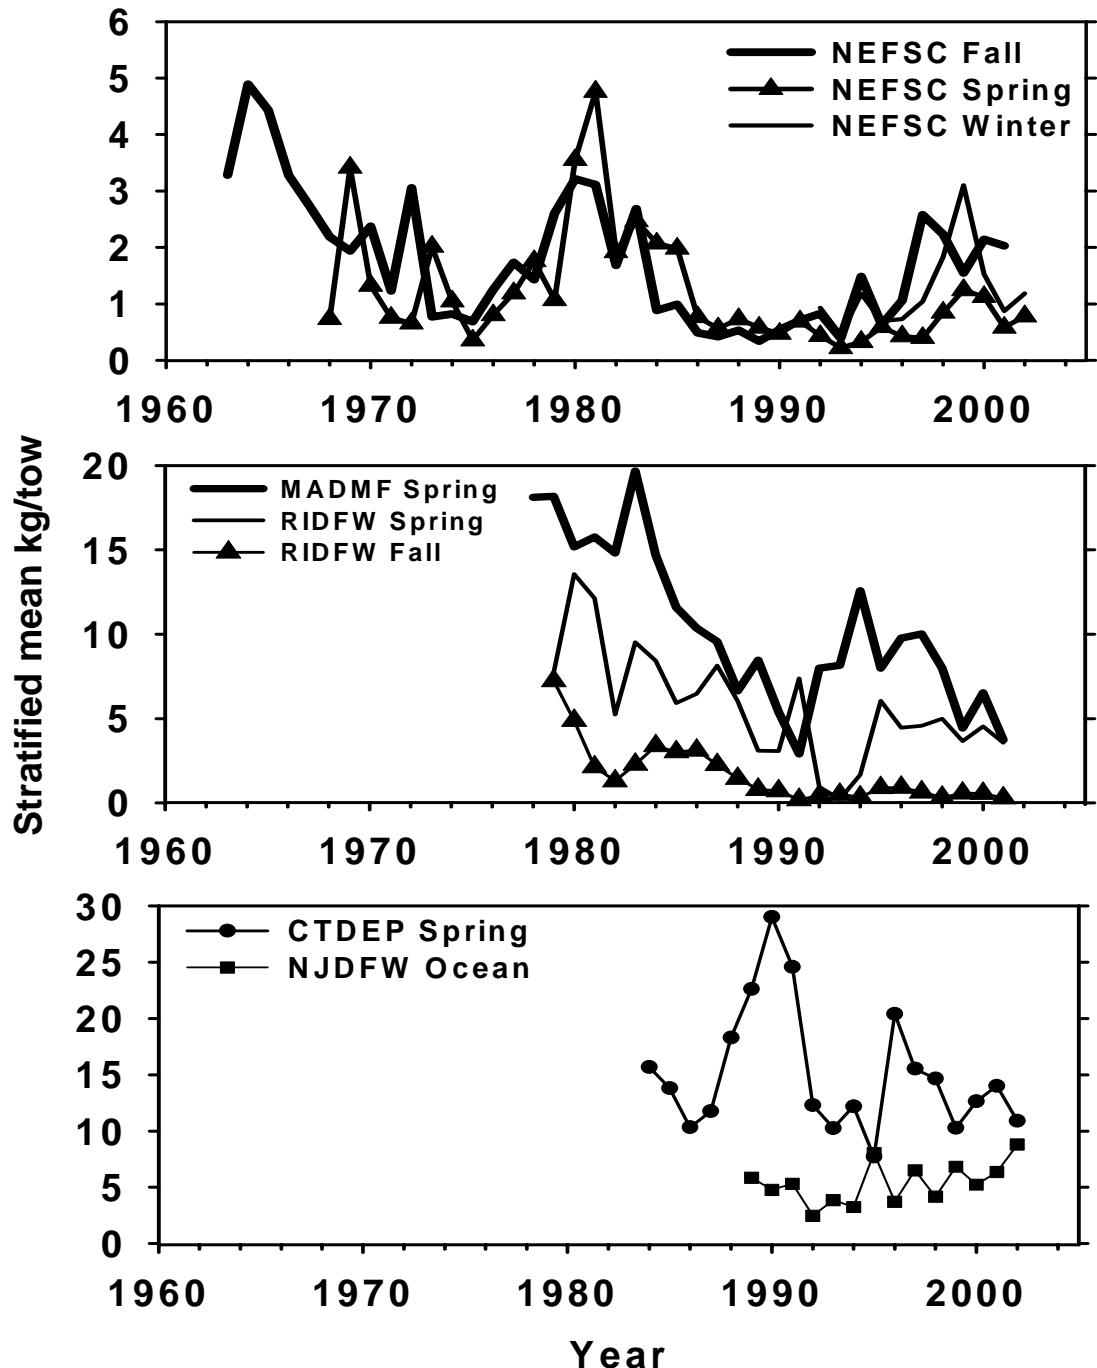

Figure B1.4. Trends in research survey biomass indices for SNE/MA winter flounder.

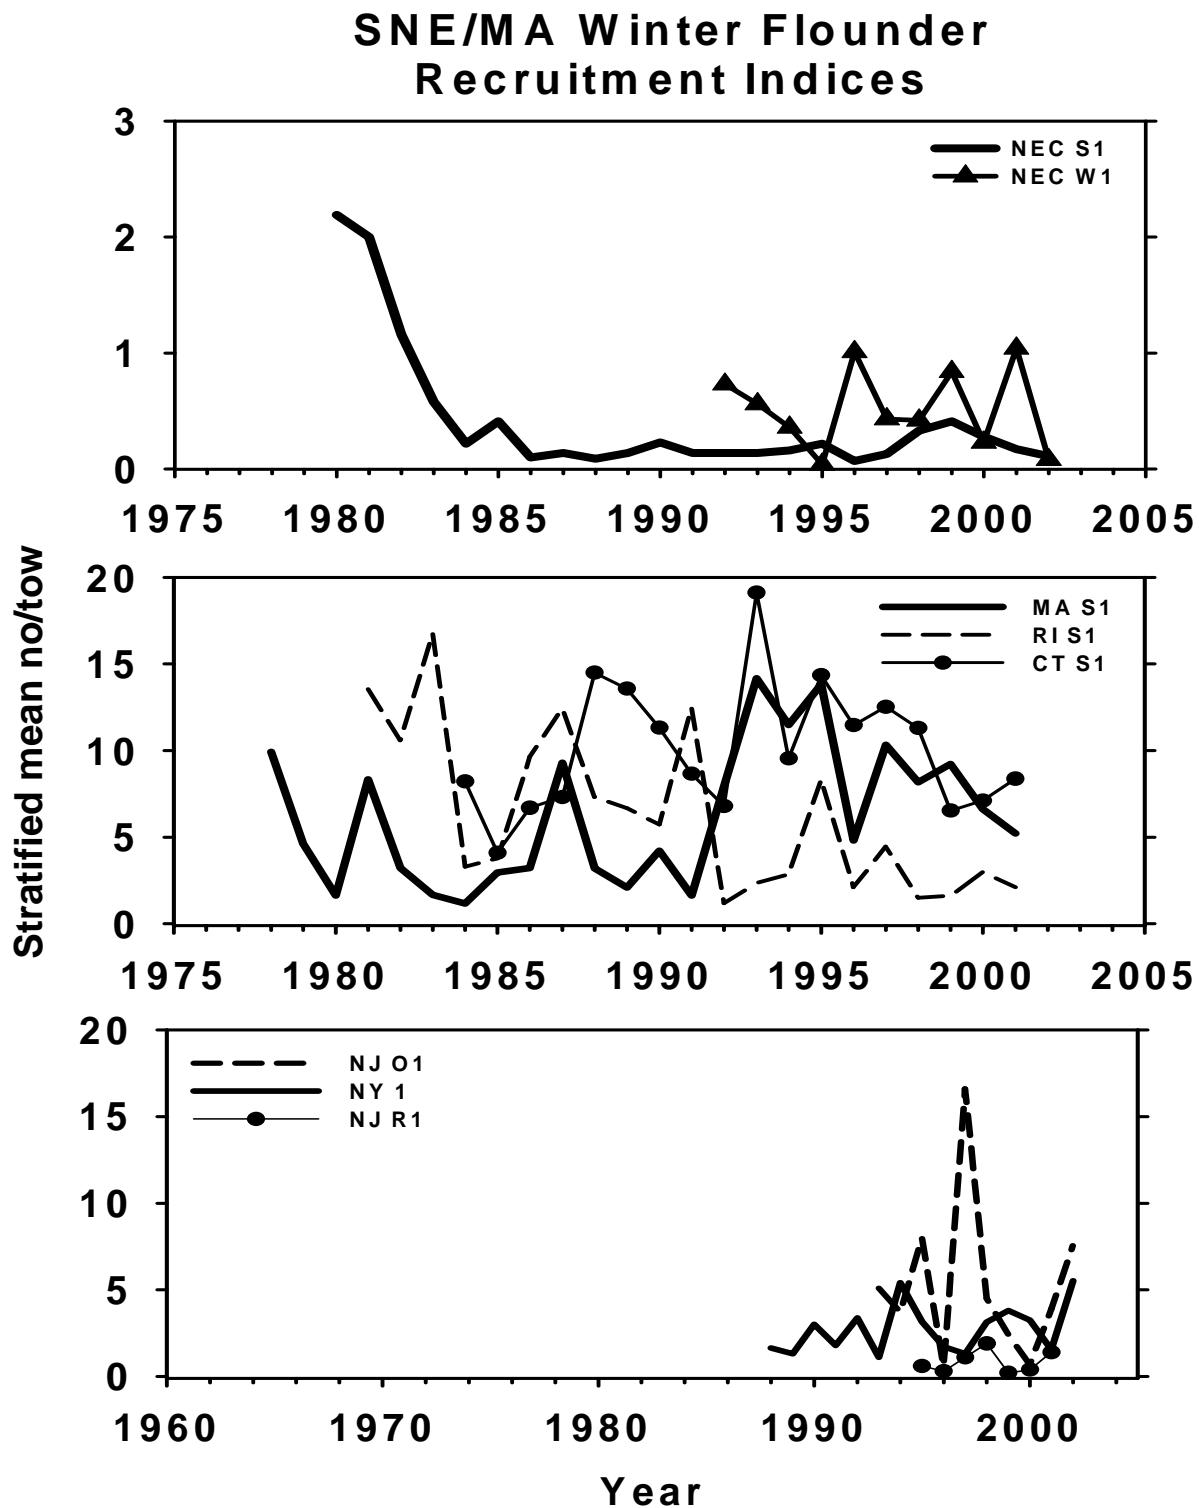

Figure B 1.5. Trends in survey recruitment indices for SNE/MA winter flounder.  
Includes spring survey age-1 indices and fall YOY indices advanced one year

## SNE/MA Winter Flounder Recruitment Indices

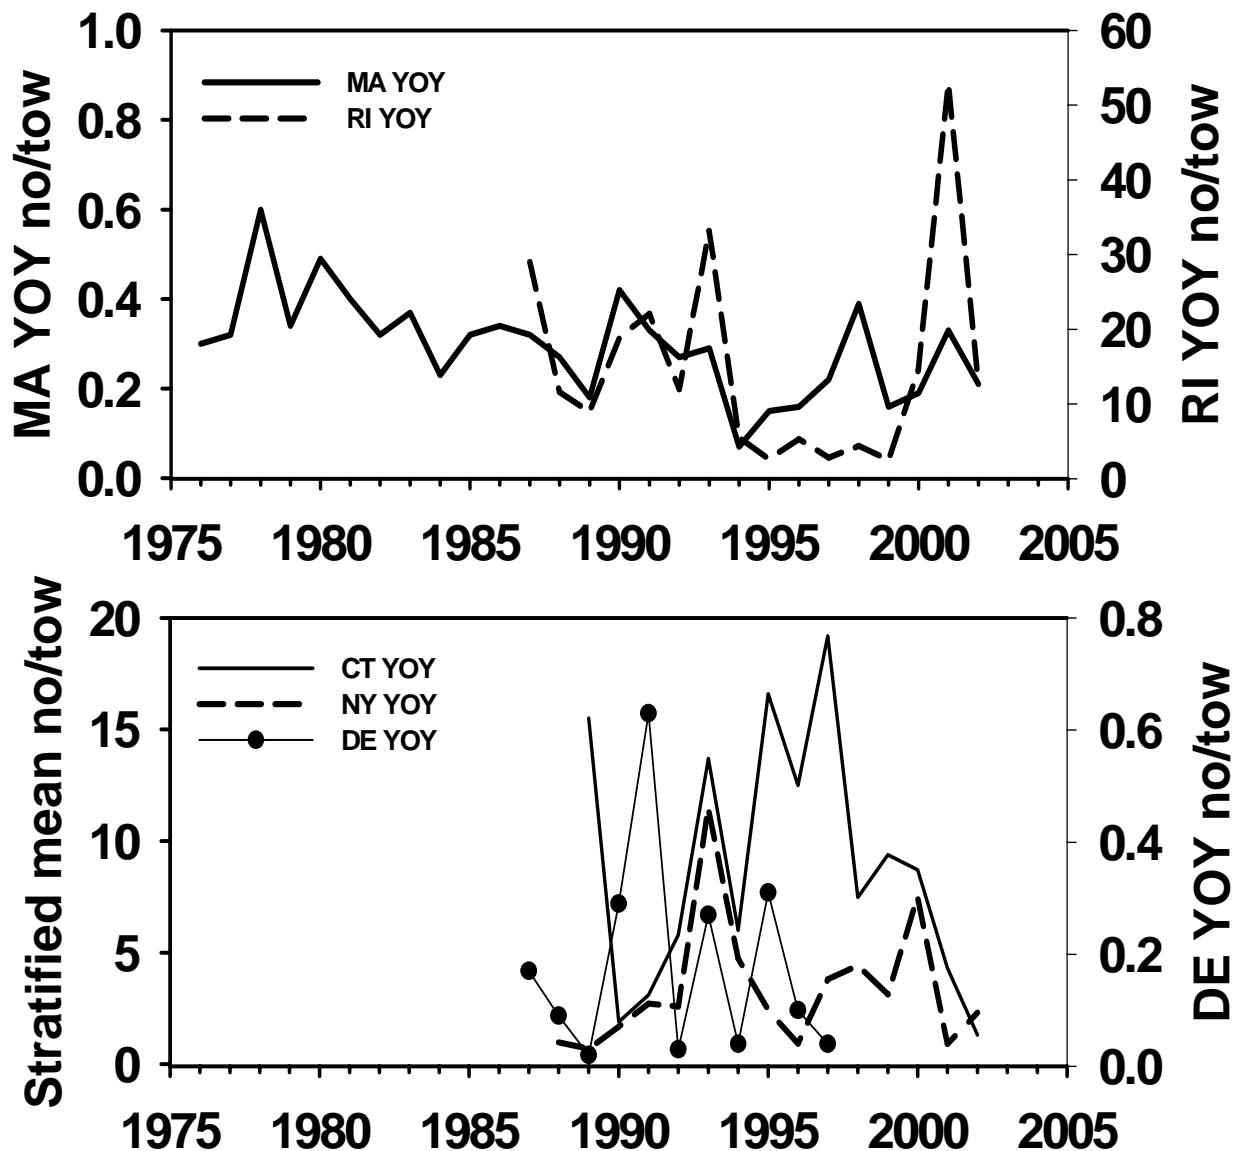

Figure B1.5 continued.

## SNE/MA winter flounder VPA Sensitivity to Tuning Indices

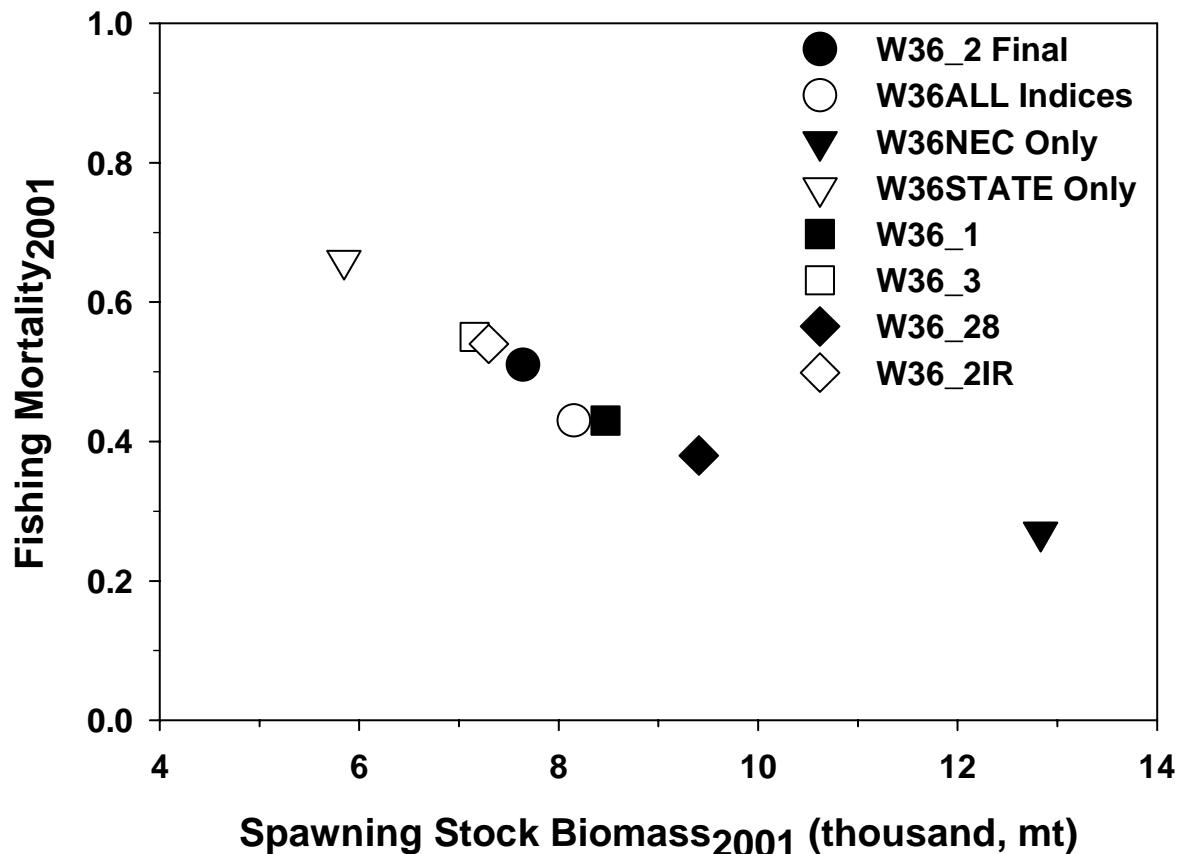

Figure B1.6. Sensitivity of the SARC 36 VPA for SNE/MA winter flounder to alternative combination of survey tuning indices. Run W36\_2 was selected as the final run.

## SNE/MA Winter Flounder Total Catch and Fishing Mortality

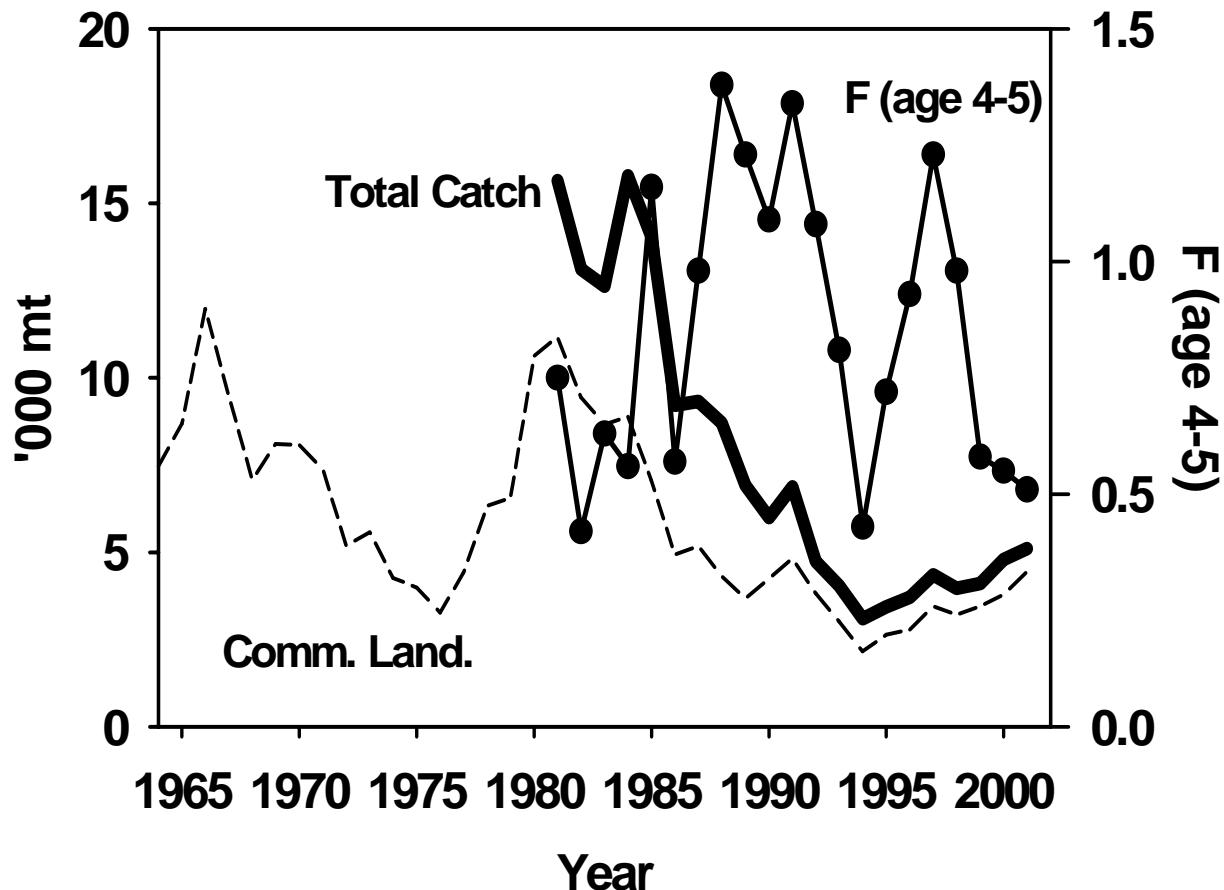

Figure B1.7. Total catch (landings and discards, '000 mt), commercial landings('000 mt), and fishing mortality rate ( $F$ , ages 4-5, unweighted) for SNE/MA winter flounder.

## SNE/MA Winter Flounder Precision of 2001 Estimates for SSB and F

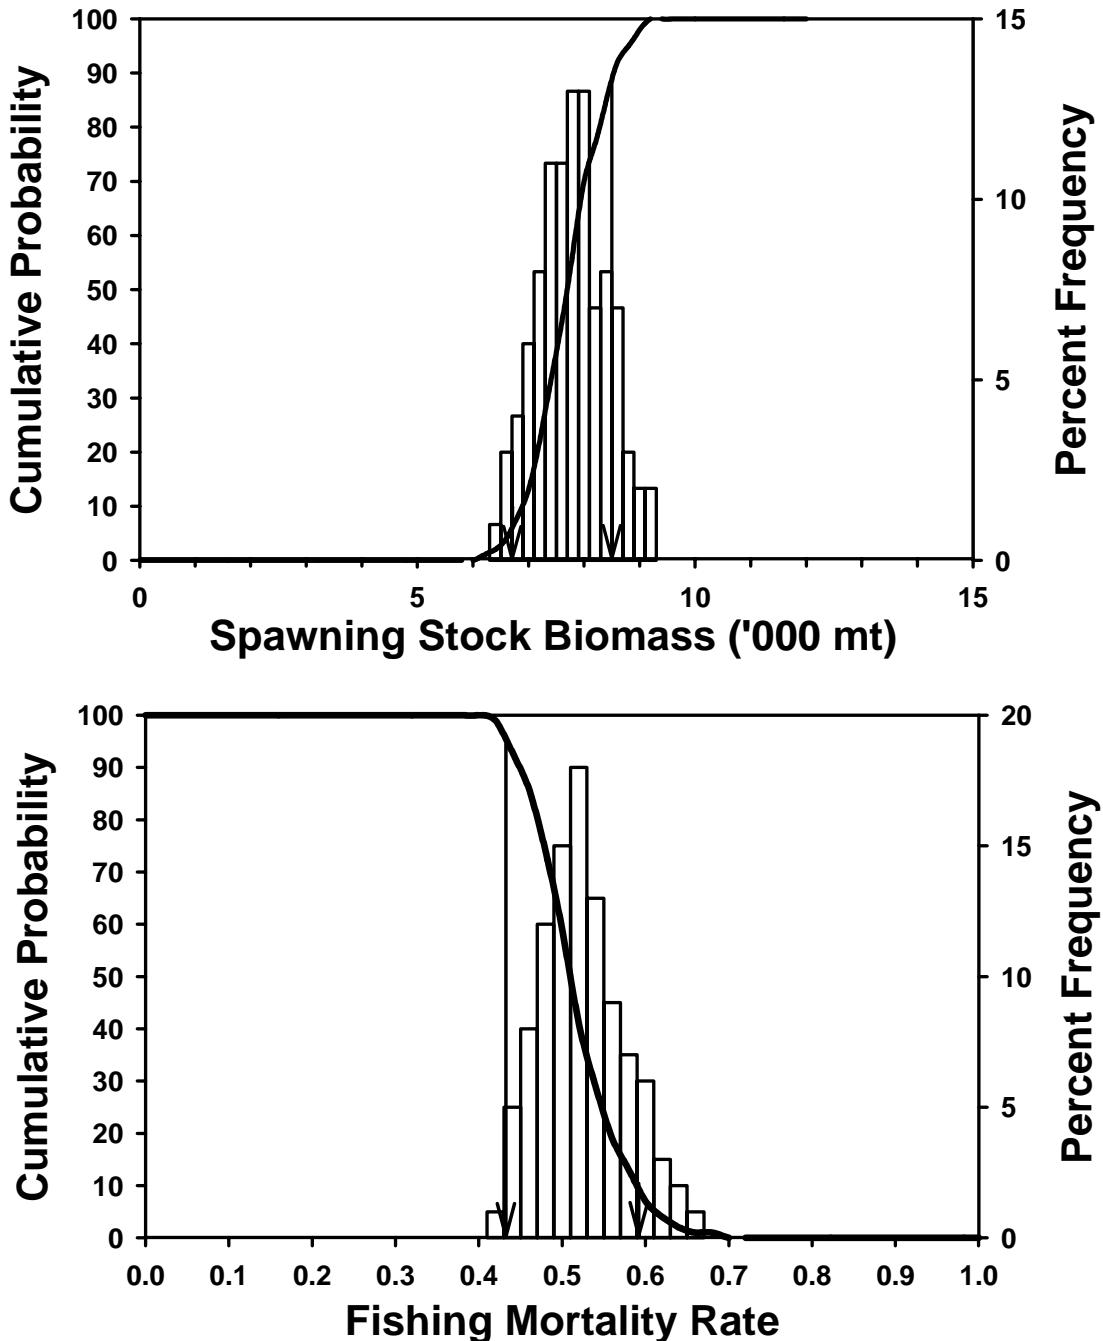

Figure B1.8. Precision of estimates of spawning stock biomass (ages 3-7+, '000 mt) and fishing mortality rate (F, ages 4-5, unweighted) in 2001 for SNE/MA winter flounder. Vertical bars display the range of the bootstrap estimates and the probability of individual values in the range. The solid curve gives the probability of SSB that is less than or fishing mortality that is greater than any value along the X axis.

## SNE/MA Winter Flounder SSB and Recruitment

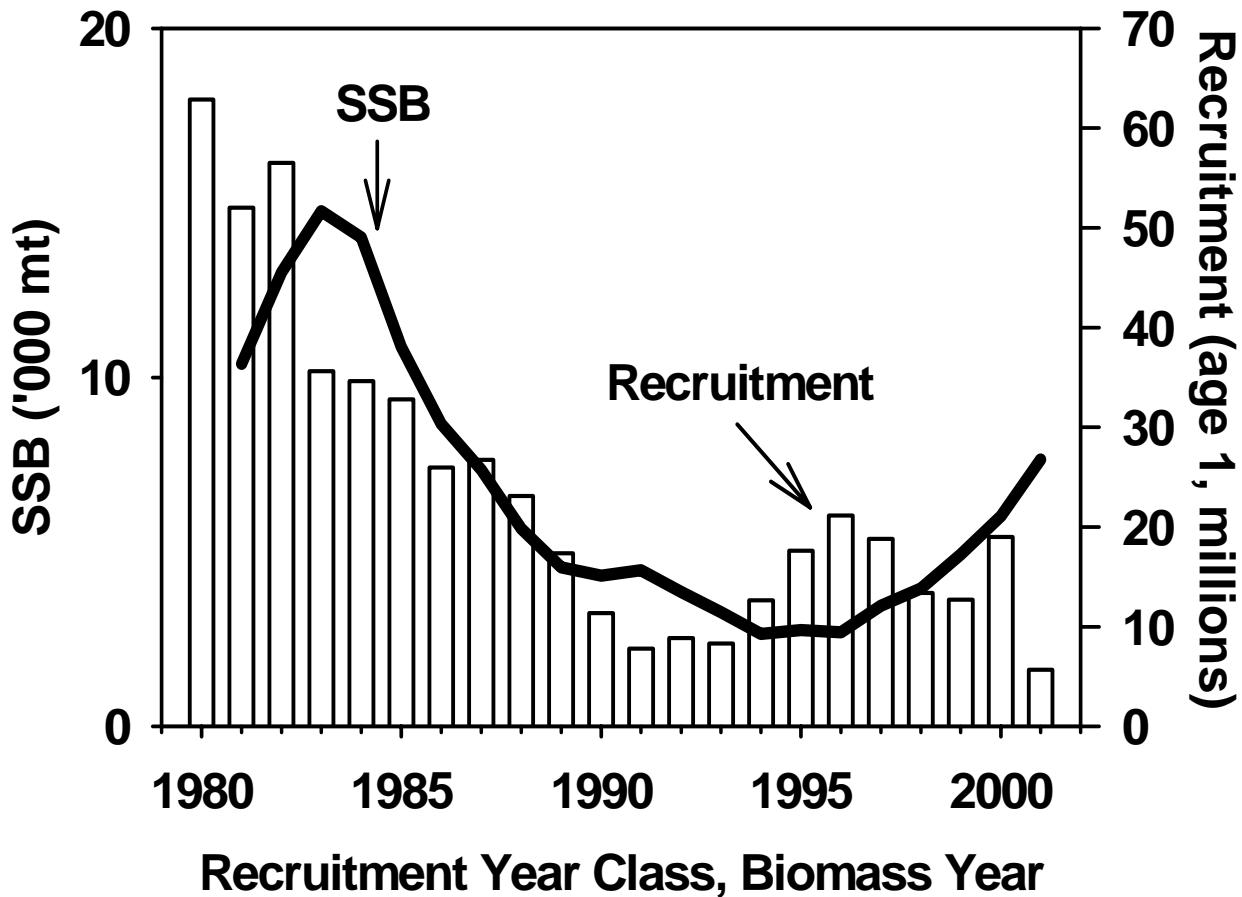

Figure B1.9. Spawning stock biomass (SSB, ages 3-7+, '000 mt) and recruitment (millions of fish at age-1) for SNE/MA winter flounder.

### SNE/MA winter flounder retrospective VPAs

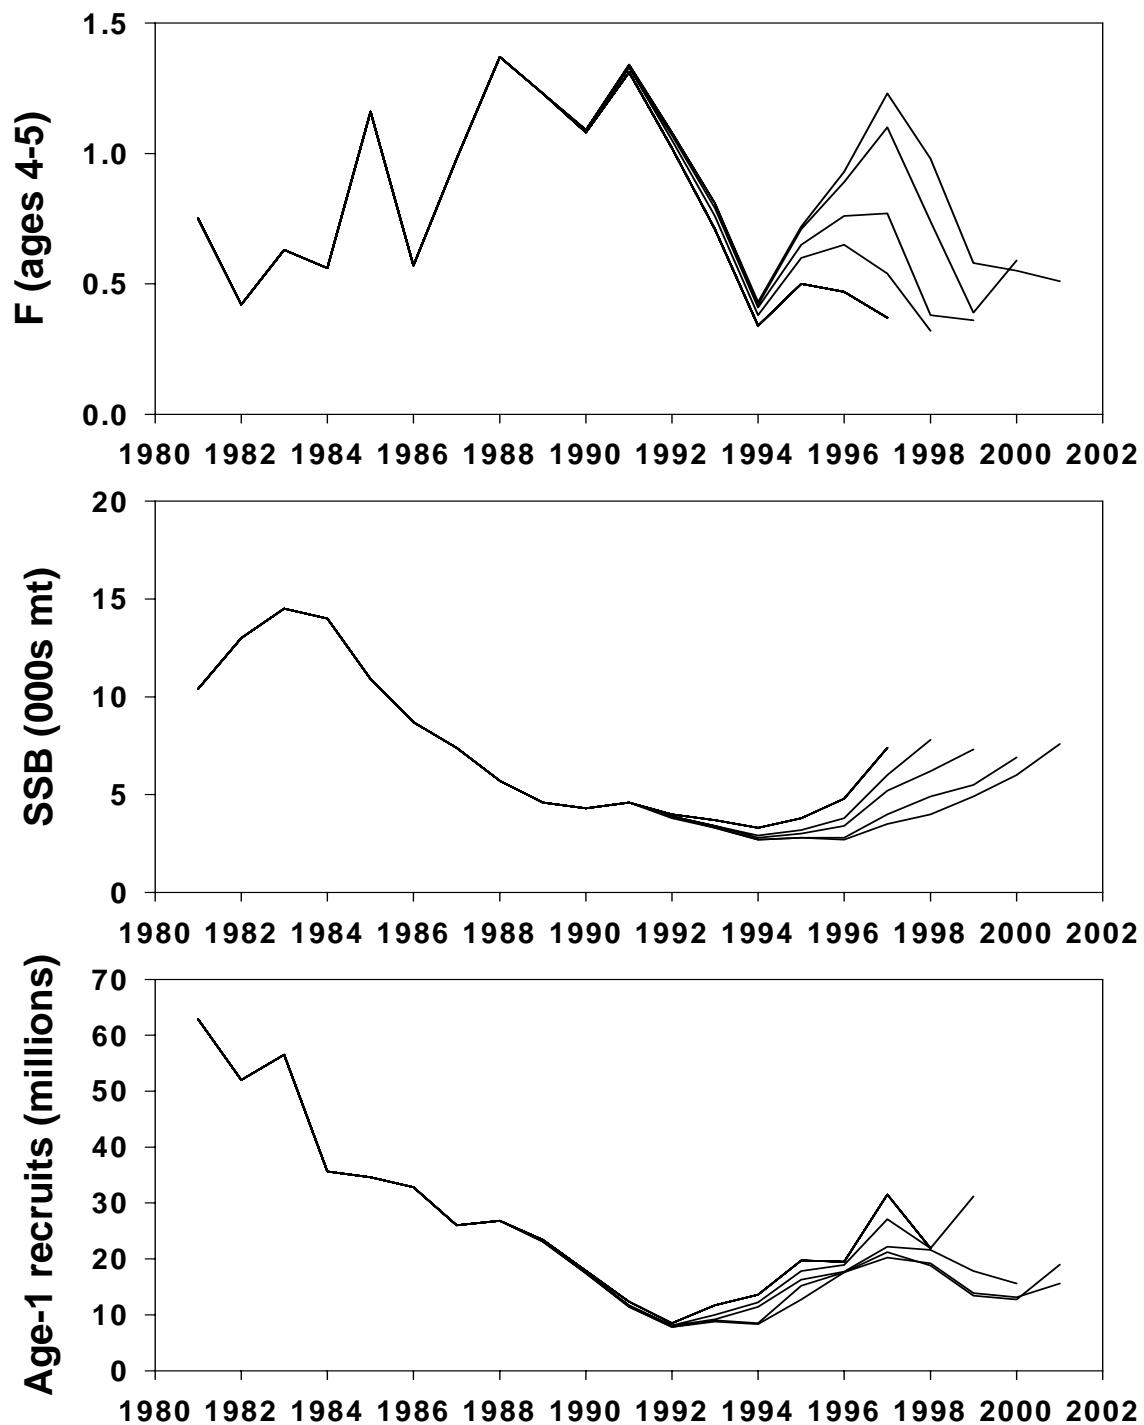

Figure B1.10. Retrospective VPAs for SNE/MA winter flounder.

## SNE/MA Winter Flounder Yield and SSB per Recruit

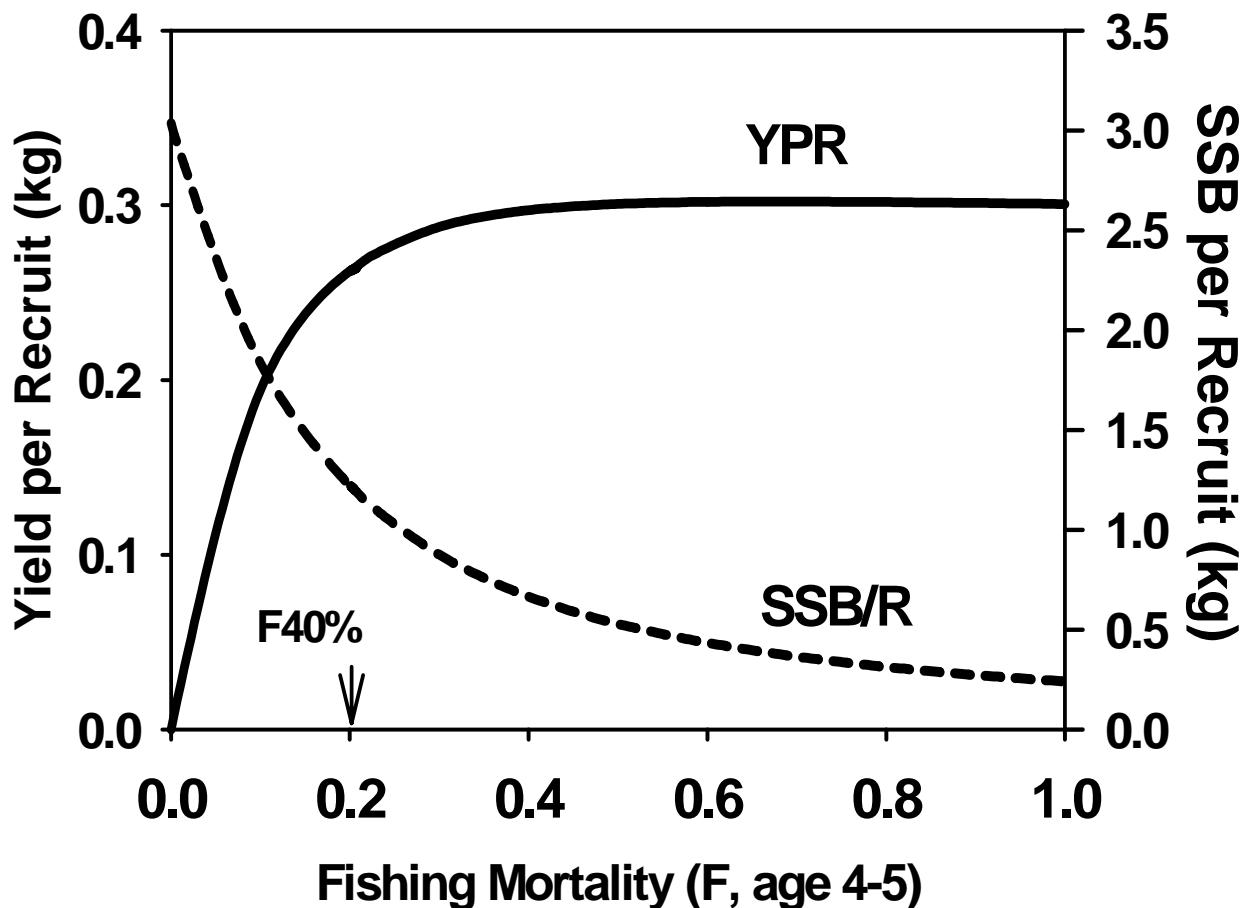

Figure B1.11. Yield per recruit (YPR) and spawning stock biomass per recruit (SSB/R) for SNE/MA winter flounder.

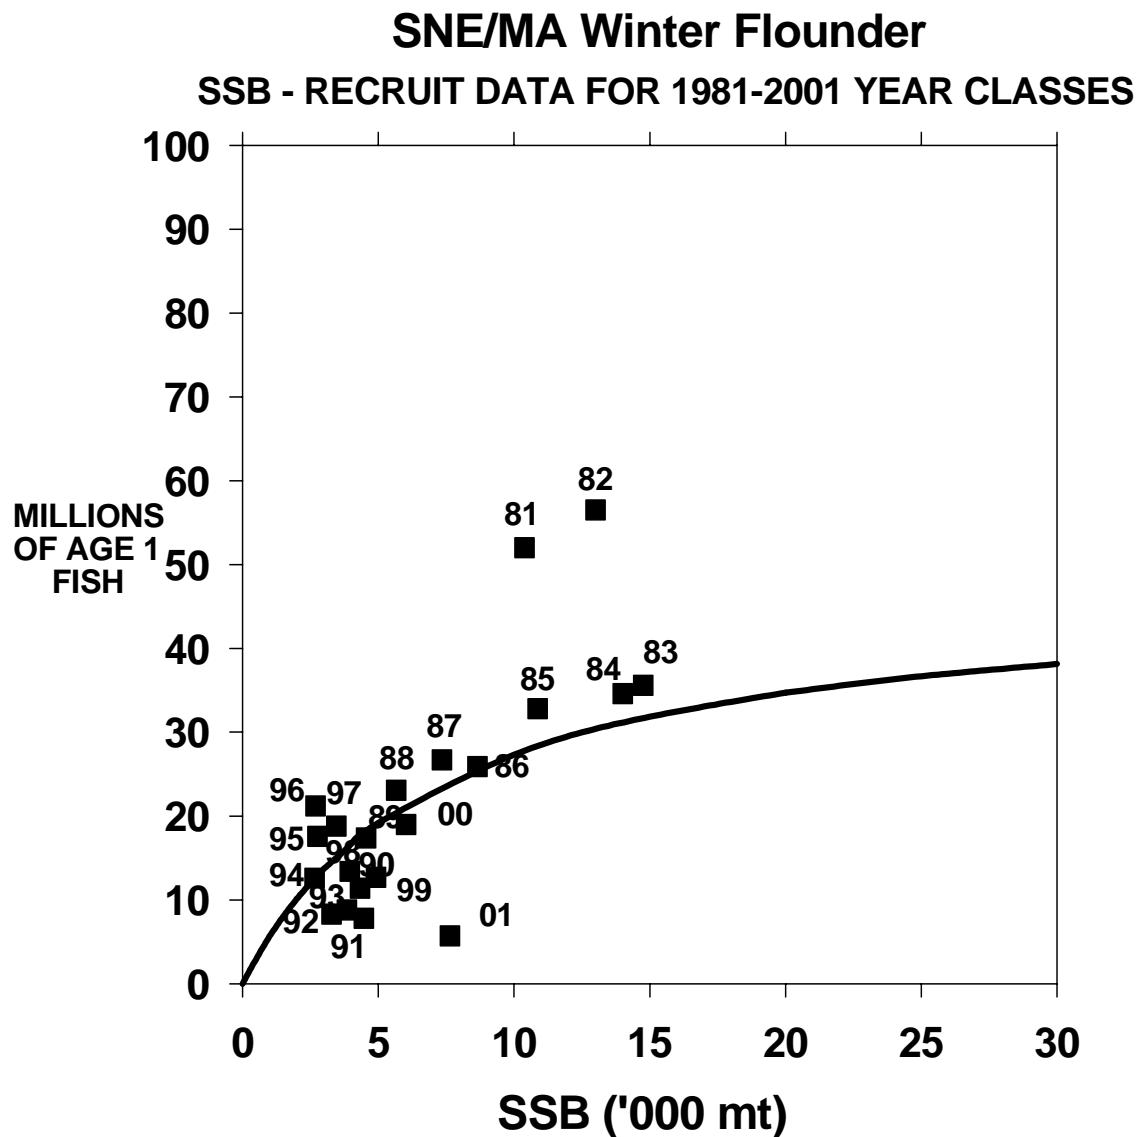

Figure B1.12. SNE/MA winter flounder SARC 36 VPA SSB and recruit data for the 1981-2001 year classes. Curved line is the S-R function estimated by NEFSC (2002).

## SNE/MA Winter Flounder

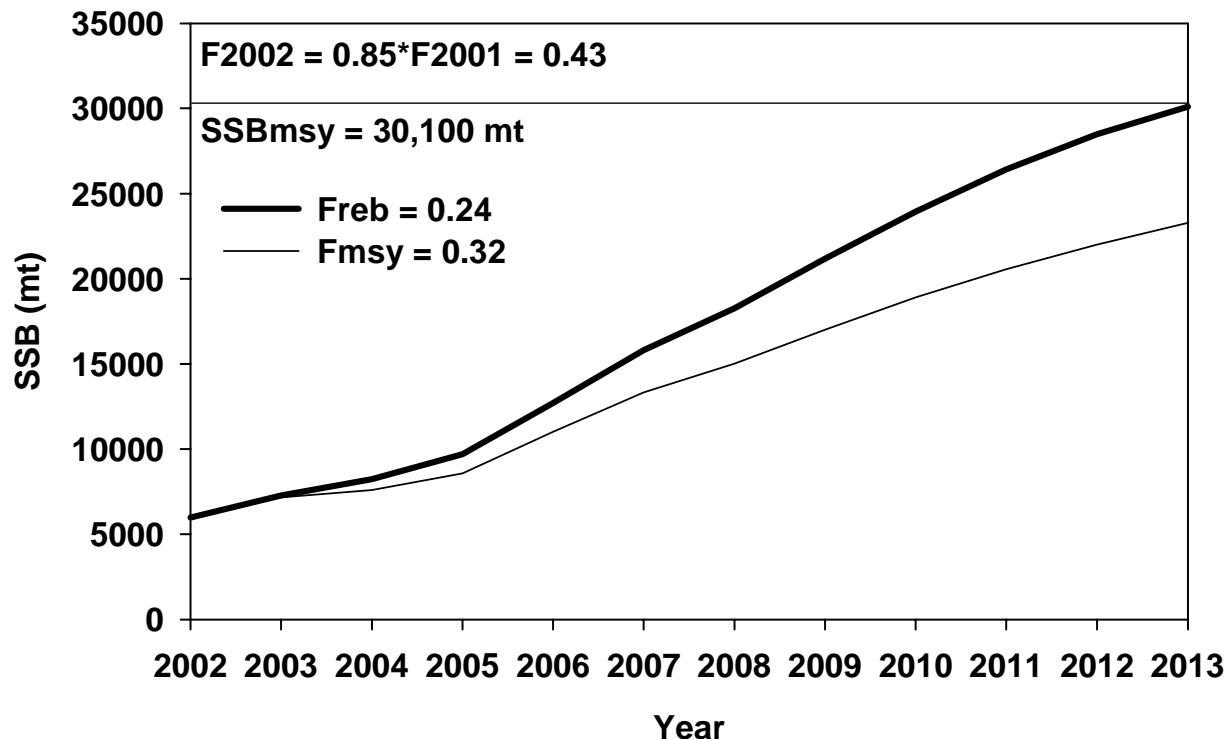

Figure B1.13. Median (50% probability) of forecast spawning stock biomass (SSB, mt) for SNE/MA winter flounder under  $F_{msy}$  and  $F_{reb}$  fishing mortality rates during 2003-2013. Assumes  $F_{2002} = 0.85 * F_{2001} = 0.43$ .

### SNE/MA winter flounder sensitivity to hypothetical NEFSC survey index adjustments, 2000-2002

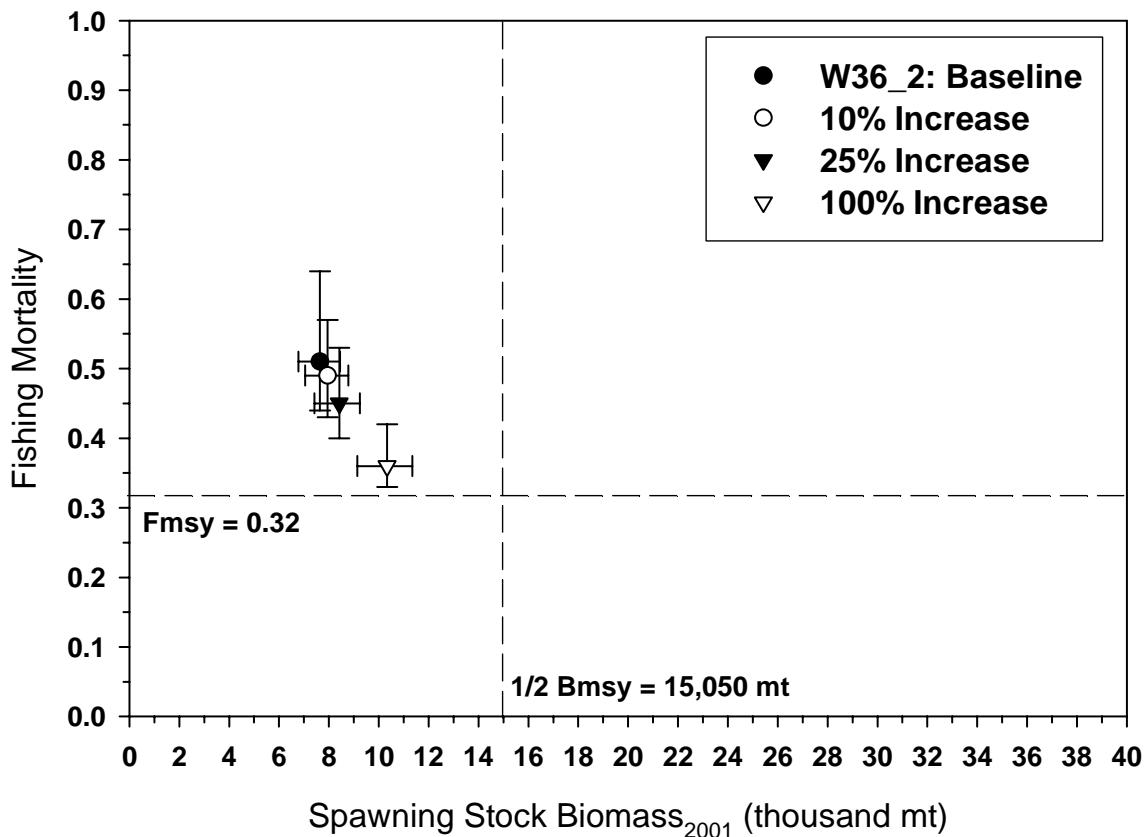

Figure B1.14. SNE/MA winter flounder VPA sensitivity to hypothetical NEFSC winter, spring, and fall survey index adjustments.

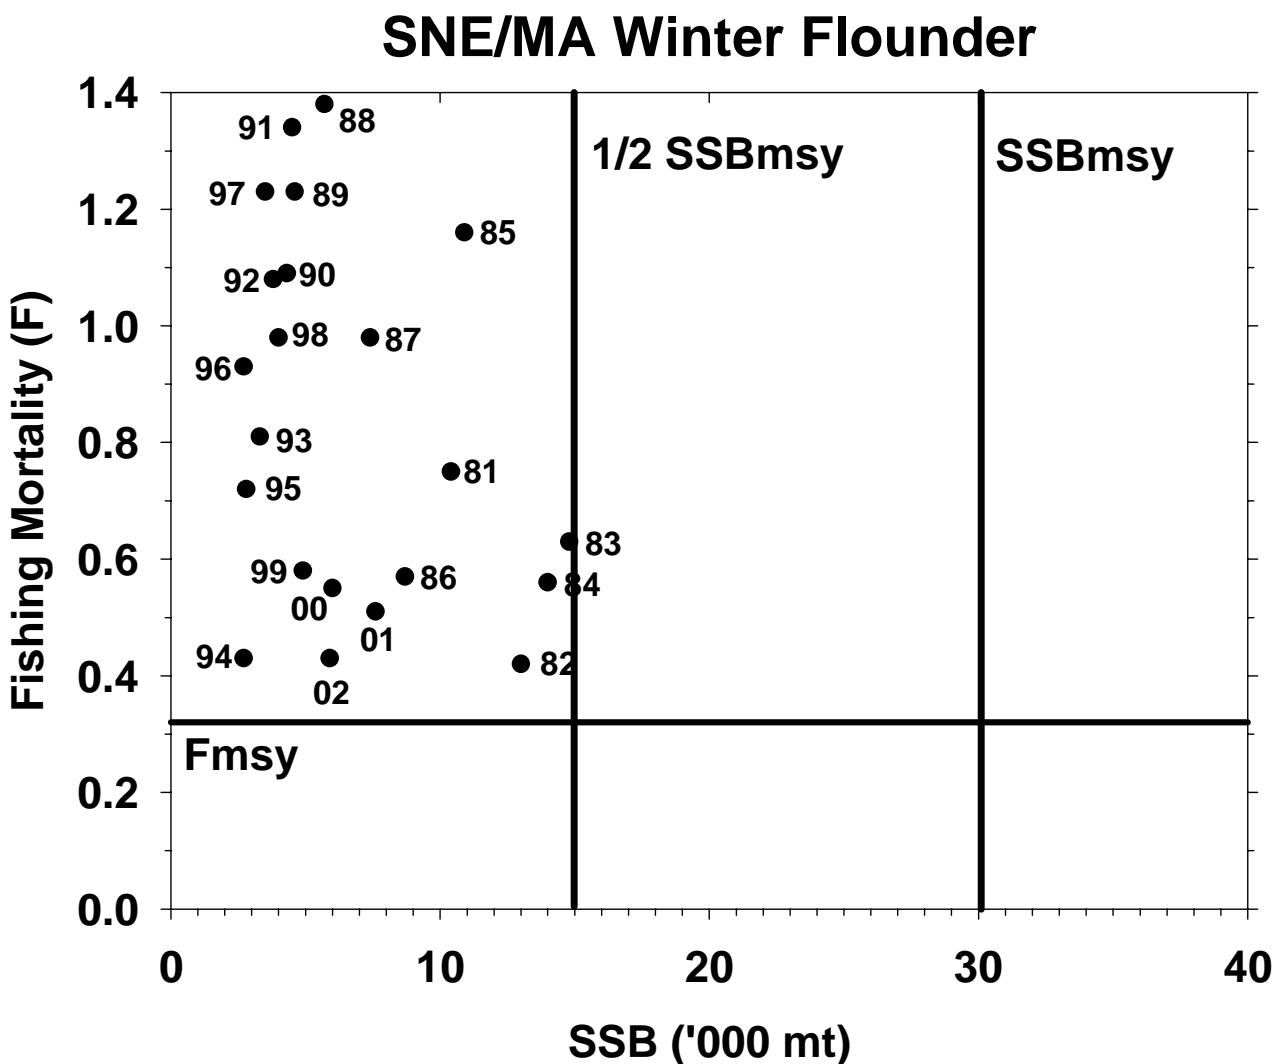

Figure B1.15. SSB and F for SNE/MA winter flounder. NEFSC (2002) biological reference points ( $F_{msy} = 0.32$ ,  $SSB_{msy} = 30,100$  mt) are also shown.
